

RETAIL & POINT OF SALE

PeridotX POS

Point of Sale with Inventory, Purchasing & Accounting

A fast counter-sales system sitting on a full inventory, purchasing and accounting back-office. Cashiers work in sessions with a supervisor-controlled void, tender by cash, card or customer account, and every sale posts to the same stock and General Ledger the rest of the business runs on — with X and Z reports at the end of every shift.

Session-based cashier control: open → sell → close

Supervisor-approved voids, X & Z reports

Stock, purchasing & GL built in

What's included

Everything POS delivers out of the box

Point of Sale Terminal

Barcode-driven checkout with line discounts and customer lookup, designed for speed at the counter.

Cashier Sessions & Terminals

Register terminals, open a session with opening cash and close it with a count — every sale belongs to a session and a cashier.

Cash, Card & On-Account Tenders

Split a sale across cash, card and customer credit account, then print the receipt in one step.

Supervisor Override

VOIDs and sensitive actions require supervisor verification, leaving a clear audit trail of who approved what.

X / Z & Daily Sales Reports

Mid-shift X reports, end-of-shift Z reports and daily sales summaries — exportable to Excel and PDF.

Inventory, Purchasing & Accounting

Stock ledger across warehouses and branches, purchase orders and goods receipts, receivables, payables and the General Ledger — one database.

Modules at a glance

What's inside POS, connected end to end

- 1 Terminals & Sessions**
Register counters, open and close cashier sessions with cash reconciliation, and review session history.
- 2 Sales & Receipts**
Barcode checkout, discounts, tendering and receipt printing, with voids gated by supervisor verification.
- 3 Stock & Transfers**
Warehouse and branch stock with transfers, adjustments, counts and a stock impact trail on every document.
- 4 Purchasing**
Requisitions, purchase orders and goods receipts feeding supplier bills and returns.
- 5 Customers & Receivables**
Customer accounts, on-account sales, receipts and allocations, aging and statements.
- 6 Reports & Accounting**
X / Z, daily sales, stock and financial reports, with the General Ledger, vouchers and consolidation behind them.

How it flows

One record carries through every stage — no re-keying

The PeridotX platform

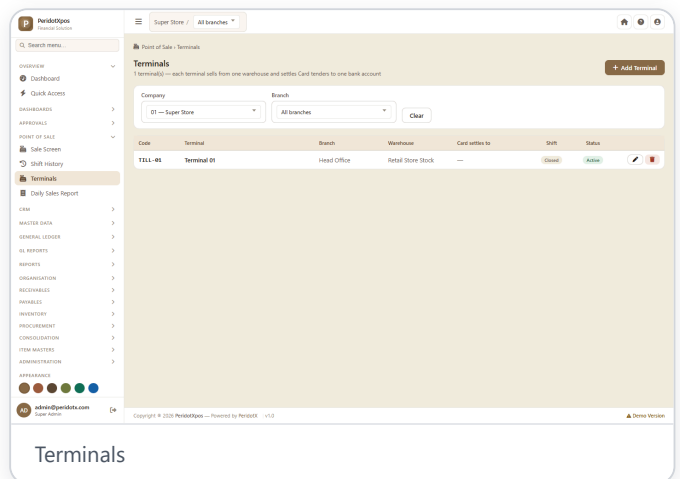

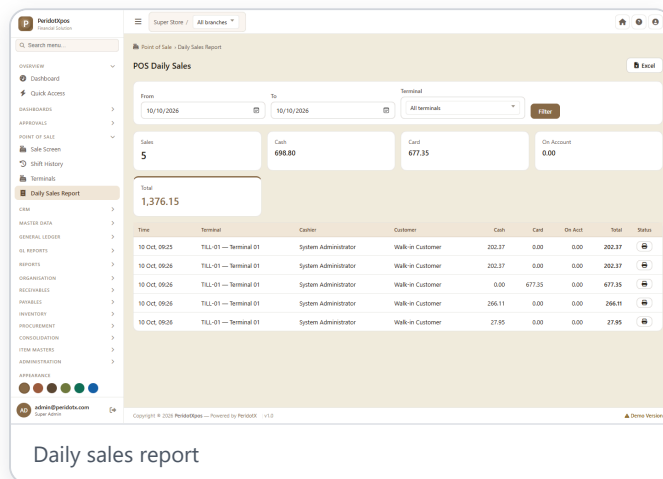

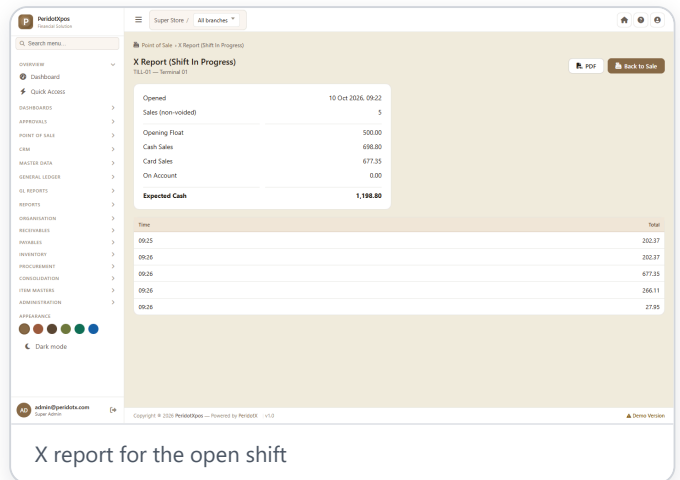

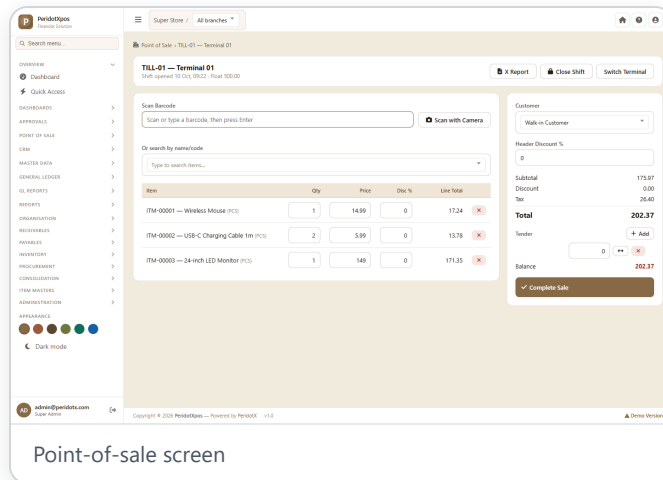

What every PeridotX product is built on, and how it is delivered

- One connected platform**
Shares the PeridotX company, branch and fiscal-year model — products combine without re-keying.
- Control by role**
Granular role-based permissions and a searchable audit trail on every important action.
- Web-based & yours**
Runs in any browser on your own SQL Server database, with per-client branding and licensing.
- Set up & supported**
Implemented around your masters and conventions, with backup tooling and ongoing PeridotX support.

See it in action

Real application screens — not mock-ups

From the till to the ledger, in one system

PeridotX POS connects the checkout counter to stock, purchasing and accounts, so the numbers at close of day are the numbers in your books.
