

PERIDOTX SUPPLY CHAIN

Items, BOMs & Inward Logistics for Manufacturers

PeridotX Supply Chain Management gives manufacturers one system for the item master, bills of materials, and inward logistics — from gate pass to inspection to goods receipt — with company setup, role templates, and user rights configured per company and fiscal year, and data integration and posting tools to keep every period clean.

Gate → Inspect
→ GRN

One inward flow

Modules at a Glance

Everything a manufacturing supply chain needs, connected end to end

I

Item Master & Item Groups

A structured item catalog with item groups, categories, and per-item pricing, feeding every downstream transaction.

B

Bill of Materials

Multi-line BOMs per assembly item, with components, quantities, and valid-from/valid-to periods for revision control.

G

Inward Gate Pass & Inspection

Incoming material logged at the gate, inspected, and only then converted into a Goods Receipt Note.

R

Goods Receipt Note

GRNs tied to supplier, warehouse, and inspection reference, recording items and quantities received into stock.

C

Company Setup & Fiscal Years

Multi-company configuration with its own fiscal year, role templates, and user rights scoped per company.

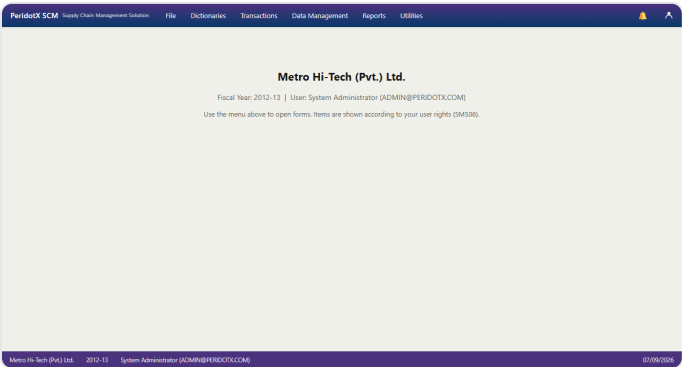

D

Data Integration, Posting & Reports

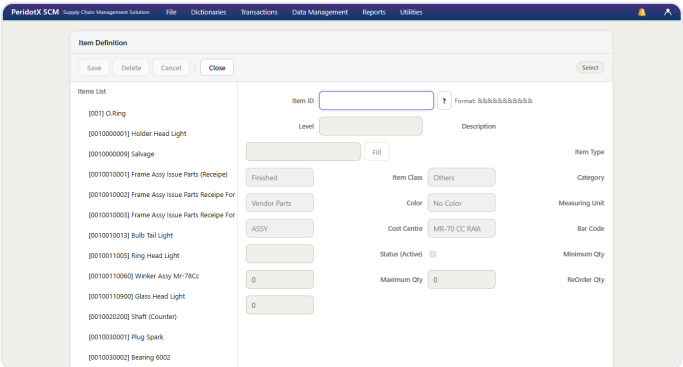

Built-in data posting/unposting utilities, a data integration tool, and a dedicated reports module.

Feature Depth, Module by Module

Item Management

- Items, Item Groups, and Product Pricing maintained centrally
- Reused consistently across BOMs, GRNs, and every transaction type

Bill of Materials

- Assembly-level BOMs with component lines and quantities
- Valid-from / valid-to periods for controlled revisions

Inward Logistics

- Inward Gate Pass logs material on arrival
- Inspection Entry records quality checks before receipt
- Goods Receipt Note posts items and quantities into stock

Manufacturing & Inventory Settings

- General settings for manufacturing and inventory, per company

Company Setup & Role Templates

- Company Setup and Fiscal Year controls per company
- Role Templates and User Rights for controlled multi-company access

Data Tools & Reporting

- Data Integration tool for moving data between systems
- Data Posting / Unposting utilities to keep periods clean
- Reports module for operational and audit visibility

One item master, one BOM, one inward gate process — no more reconciling item lists and quantities across spreadsheets and departments.

WHAT THIS MEANS FOR YOUR TEAM
