

FINANCE & SUBSCRIPTION MANAGEMENT

Run your finances, subscriptions and service desk from one system.

PeridotXbs brings receivables, payables, the general ledger, customer subscriptions and support tickets together — with real-time visibility across every branch, currency and company you run.

Multi-branch
**Companies,
branches & groups**

Multi-currency
**Live FX &
revaluation**

End-to-end
**AR, AP & general
ledger**

Built in
**Renewals & service
desk**

What's inside PeridotXbs

FEATURE OVERVIEW

Six connected modules, one login, one source of truth — from the first invoice to the renewal that follows it.

Real-time dashboard

Revenue, outstanding receivables and payables, net cash flow, open tickets and deferred revenue on one screen — by branch, company or the whole group.

Receivables & payables

Invoices, receipts, credit and debit notes, allocations, aging and customer/supplier statements — with approval workflows before anything posts.

General ledger & reporting

Trial balance, P&L, balance sheet, day book and journals, with multi-currency FX revaluation and full financial-year close checklists.

Subscriptions & renewals

Track every customer subscription, deferred revenue schedule and license, with automatic renewal alerts before anything lapses.

Service desk

A built-in ticketing queue for customer support — priority, status and assignment tracked next to the account, not in a separate tool.

Controls & audit trail

Role-based access per organization, approval authorities, and a full audit log — every document, every user, every change.

FOR RESELLERS & IT PARTNERS

Multi-tenant by design — separate companies and branches per client, licensed and deployed on your own infrastructure, with backup and restore built in.
